

A

GRADY

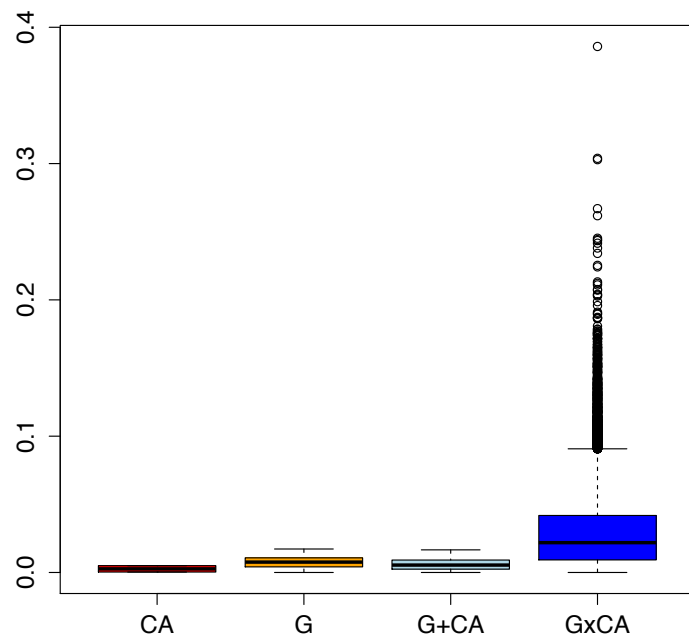

B

PReDICT

C

**Suppl. Figure 6:** Boxplot of the differences in adjusted  $R^2$  between the best model (highest adjusted  $R^2$ ) and next best model (second highest adjusted  $R^2$ ) in GRADY (**A**), PReDICT (**B**) and U19 (**C**). The x-axis denotes the best model, the y-axis denotes the differences in adjusted  $R^2$  between the best model (highest adjusted  $R^2$ ) and next best model (second highest adjusted  $R^2$ ).
